

Spotit and Exmar started their partnership years ago, in 2016. All the hard work and dedication lead to a wonderful collaboration and both parties are now looking into expanding this collaboration to the USA.

About Exmar

Exmar Group developed from a traditional shipping company into an innovation-driven energy provider, mainly focusing on gas. Due to geopolitical forces their business became even more critical the past few months. And while Exmar secures our energy supply, spotit secures Exmar's critical assets and business via the spotit SOC.

Interested in our spotit SOC?

Do you wish to enjoy the same level of 24/7 protection of your critical assets? Reach out to us via info@spotit.be or give us a call: +32 (0)9 394 44 41

Challenge

In 2016, Exmar was looking for a security partner to implement their firewalls and decided that spotit was the right partner at the time. Over the years, our collaboration intensified and led up to Exmar electing spotit SOC services to secure Exmar's business and operations.

Solution & offering

Spotit set up a Security Operations Center, ensuring 24/7 monitoring, detection, and response of Exmar's security landscape.

Spotit SOC grants Exmar peace of mind by providing security strategy & governance and a state-of-the-art automated security stack, leveraged by the experience of highly motivated experts.

By using proven processes and the best technologies on the market, the spotit SOC succeeds in detecting, reporting on, and eliminating known and emerging security threats in a timely manner. Efficient and effective security operations ensure Exmar can concentrate on their core business.

"We are ready to cross the ocean with spotit"

Following the successful implementation of SOC services, Exmar and spotit USA are now examining the possibility of expanding our collaboration to our Exmar office in Houston. I have a great feeling about this and look forward to crossing the ocean with spotit.

- David De Roock, ICT Director of the Exmar Group
